

Be the Change

Written by Silvia Lui (3F 19)

I live in To Kwa Wan. It is a suburban community with quite a lot of people. It has skyscrapers and apartment buildings. There are different types of transport, such as taxis, minibuses, buses and cars. My community has a lot of facilities, for example, shopping malls, small shops, parks and restaurants. To make our community better, safer and more convenient, we have chefs, waitresses, security guards and drivers.

As a good citizen, I have to take care of my community. I can hold the door open for others. I can also help someone get up when they fall down. Moreover, I can reduce paper waste by using both sides of the paper. I can then throw the used paper into the recycling bins.

I want to contribute to my community, so I must make a difference! In my community, there are a lot of stray animals. I want to help them. First, I will give them food and water. Second, I will ask my parents if I can adopt one of them. If they disagree, I will bring it to the animal shelter. Lastly, I will create posters about not abandoning stray animals and encouraging adoption. We should always help our community. I love my community!
